NICB

NICB - DCU

The NICB (National Institute for Cellular Biotechnology) is a multidisciplinary centre for research in Fundamental and Applied Cellular Biotechnology, Molecular Cell Biology and Biological Chemistry. It includes a multidisciplinary team of Cell and Molecular Biologists, Biotechnologists, Chemists, Computer Scientists, and experts in Bioscience Communication.

Built on the DCU Campus, the NICB is a state of the art building which houses offices, laboratories with over 1,000sq.m. of clean rooms and ancillary areas. Update Technology were contracted to install the electrical services for this project and commenced on site in May 2005.

Client:	Dublin City University
Architect:	Scott Tallon Walker
Main Contractor:	Bennett Construction
Consultant:	Varming Consulting Engineers
Construction Period:	13 Months
Scope of Works:	Electrical Installation
Value:	€1.75 Million
