PORTMARNOCK

PORTMARNOCK HOTEL

The Portmarnock Hotel is an international standard 4 star hotel. Located on the northside of Dublin City close to Portmarnock Beach, the hotel has 84 rooms and can boast one of Irelands most prestigious golf courses.

This project consisted of the refurbishment of the existing hotel including the listed Jameson Building and a new accommodation block.

The key to the successful completion of this project was the detailed planning and co ordination of the new cable containment. As our services substantially impact on the fabric of the building, the in-depth planning, routing and concealing of these services led to the new installation having virtually no impact on the existing building after the refurbishment.

In 2006 Update Technology were contracted to add another new accommodation block which will house 40 bedrooms.
